Summary

As a passionate and skilled coder, pursuing expertise in Java, C++, and Data Structures and algorithms is my primary focus. Additionally, foundational knowledge in web development, including HTML, CSS, and JavaScript, with exposure to React, has been acquired. The aim is to contribute programming skills and engage in collaborative learning within a dynamic IT environment.

Summer Training

Completed an intensive 6-week summer training on the MERN stack at Cipher Schools, where I developed dynamic and responsive web applications using MongoDB, Express.js, React.js, and Node.js. I engineered robust server-side logic, crafted interactive front-end components, and integrated MongoDB for efficient data management. During the training, I collaborated with peers on group projects, and debugged complex issues across the stack, ensuring scalability and accessibility. I also explored advanced concepts such as authentication, authorization, and real-time data handling to create secure and efficient applications. A key highlight was the development of a full-stack "Foods Delivery Site," featuring restaurant listings, order management, and user authentication. This hands-on experience honed my full-stack development skills and reinforced best practices in coding standards, version control, and project management.

Projects

Chat Application

Domain: Web Application | Languages: JAVA

Apr 2024

- Constructed a chat application for seamless communication.
- Developed features for real-time messaging and created a new landing page to enhance customer experience.
- Leveraged Java Swing and AWT for responsive and interactive user interface.
- Used Socket.io for efficient communication between the server and clients, ensuring real-time updates and a smooth user experience.

Weather Report App

Domain: Android Application | Languages: Kotlin, XML

Nov 2023

- Built a weather report app using Kotlin and XML.
- Implemented an intuitive user interface for seamless navigation and a visually appealing experience.
- Leveraging APIs for accurate data retrieval, the app delivers real-time weather information, encompassing temperature, humidity, and forecasts.

Certificates

MERN Stack Web Development — *Cipher Schools*

July 2023

Data Structures and Algorithms — *Coding Ninjas* ([Certificate Link](#))

May 2023

Technical Skills

Languages Java, C++, JavaScript

Technologies/Frameworks: Spring, React JS, Node JS, Git, GitHub, Docker

Skills: Data Structures and Algorithms, Problem-Solving

Education

Lovely Professional University Punjab

2021 – 2025

Computer Science and Engineering — CGPA: 7.14

Jalandhar, Punjab

Bir Bikram Institution

2020 – 2021

Higher Secondary — Percentage: 72 %

Dharmanagar, Tripura

Bir Bikram Institution

2018 – 2019

Matriculation — Percentage: 72%

Dharmanagar, Tripura
